ROASTED SOYBEANS REPORT

Report date: 2/ 3/2003

REPRINT OF ORIGINAL
 Sample number: 008160

TO: Dilts & Metzler
 2501 W Washington Rd
 Ithaca, MI 48847

ACCOUNT # 1772 (0)
 SAMPLED BY: Dilts & Metzler
 SAMPLED FOR: DILTS & WETZEL

PRODUCT: #3 beans

RESULTS: Moisture		5.35%
Dry Matter		94.65%
	<u>DRY BASIS:</u>	<u>OE I#:</u>
Crude Protein	42.35%	40.56%
Protein Dispersibility Index		9.86
Urease Activity (pH unit rise)		0.01

U.S. Dairy Storage Research Center, Madison, WI, has established the following table evaluating an optimally heat-processed soybean for lactating dairy cattle:

PDI Range-	Greater than 14	13.99 - 11.01	11.00 - 9.00
Interpretation-	Underheated	Slightly Underheated	Optimum
Your Sample-	XX		

In addition to an optimum PDI value, a properly heat-processed soybean will have an urease activity (pH unit rise) of less than .02
